

The Most Eco-Friendly Performance Textiles

SOFT SHELL

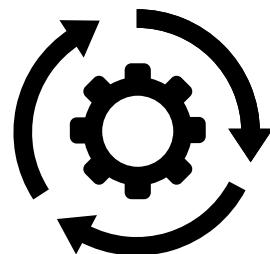

The Solution Dye Difference

Eterna™ Soft Shells are 100% solution dyed. Solution dyeing is an ecologically sound process that delivers vibrant colors every time. It ensures colors coat not only the surface of a fabric but the entirety of each fiber, resulting in sharper, longer-lasting colors while limiting resource consumption and reducing hundreds of tons of water waste.

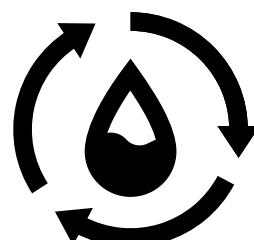

**Reduced CO₂
Emissions**

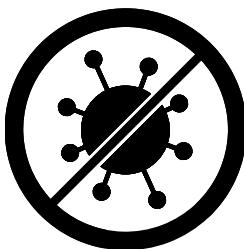

**Fewer Resources
Consumed**

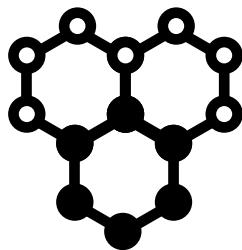

**Longer-lasting
Colours**

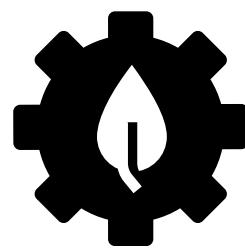

**Less Water
Wasted**

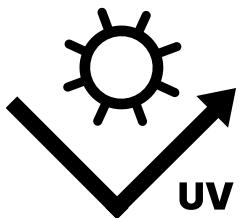

Anti-bacterial

**Graphene
Composition**

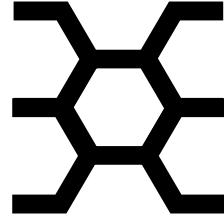

**Low Carbon
Manufacturing**

UV Protection

Poly-nylon Base**

Discover the New Generation of High-Performance Soft Shells

Soft Shells deliver unending functionality, durability, and sustainability.

It's versatile enough for nearly all outdoor apparel, as it's expertly crafted to withstand the harshest natural elements, all while comforting and protecting the skin of those wearing it. Designed with recycled content and manufactured with a proprietary low-carbon technology, it also upholds the highest responsible production standards.

For performance that knows no bounds, Eterna™ Soft Shells are pioneering a new tradition of excellence in textiles.
